

The Wainwright Star

PHONE 86 for
H. HERBERT
— THE DRAYMAN —

VOLUME XIII, NUMBER 51

WAINWRIGHT, ALBERTA, WEDNESDAY, NOVEMBER 23rd, 1921.

PRICE \$2.00 Per Year in Advance.

BYLAW IS PASSED DEPENTURE ISSUE ELECTRICAL SCHEME

Only routine business was dealt with at the adjourned meeting of the Council held on Monday evening when Deputy-Mayor Davison occupied the chair.

The Secretary read the approval of Bylaw No. 130, which authorizes the issue of debentures for the power plant, and Wiley-Yeager—That letter re Bylaw No. 130 be received and acknowledged—Carried.

Under the heading of reports of committees, the councillors appointed for the purpose of enquiry re the Town Hall, reported that having fully gone into the matter they could only find that the complaints seemed to be purely hearsay. They had, however, given instructions that if necessary at any time the A. P. P. be notified.

Fish-Wiley—That report of special committee on conduct of persons at firehall be accepted—Carried.

The Skating Rink Committee reported that they had prepared the program for the season and set the rates, and Fish-Wiley—That report of special rink committee be accepted—Carried.

The Health, Parks and Cemetery Committee reported that they had gone into the prices to be charged for the plots at the newly surveyed cemetery, and presented the list and recommended its adoption.

Wiley-Fish—That the report be accepted and the prices recommended be adopted—Carried.

Councillor Wiley reported for the Electric Utility Committee, and stated that the committee had gone into the matter of the wiring of new places.

They thought that the Council should carry a stock of materials on hand.

Wiley-Yeager—That the Utility Commissioner be authorized to procure a supply of necessary material for wiring up new premises, and that he go to the work where requested and that he be allowed a bonus of 50c per outlet for such work done—Carried.

Bylaw No. 133, being a bylaw appointing a returning officer for the municipal and school board elections for 1921, was introduced giving the necessary three readings and passed. Secretary Pawling was the appointee and the dates set were December 5th for nomination day and December 12th for election day if necessary.

The matter of the state of the sidewalk in front of the head auditorium property was brought up by Councillor Fish and after this had been discussed.

Fish-McLeod—That the secretary notify the owners of lots 13-14 blk 5 of the condition of the frontage of the excavation on their property and instruct them to make the necessary repairs to render the same safe for the public in the use of the sidewalk in front of the property—Carried.

CONDITIONS HERE

BETTER THAN IN

OTHER COUNTRIES

The receipts of grain at western elevators continue to be greatly in excess of those of last year, of any prior year, with the exception of 1915. To some extent the grade has been deteriorated by inclement weather, and this, with low prices, has been disappointing to the growers. As a whole, however, the proceeds of the harvest even at the lower prices, should enable the growers to liquidate current indebtedness to a satisfactory extent since the November monthly commercial letter of the Canadian Bank of Commerce.

Crop sales have already stimulated business, many lines of which show a distinct improvement over their condition in September.

Crop sales have already stimulated business, many lines of which show a distinct improvement over their condition in September.

The extent of unemployment, the number of business failures in Great Britain, necessitating in the latter country extraordinary measures of relief.

WOMEN'S INSTITUTE REGULAR MEETING

A regular meeting of the W. I. was held at the home of Mrs. Middlemass on November 12th, when 17 members and three visitors were present. After the usual routine business and the planning of a big bazaar to be held on December 17th, all enjoyed the refreshments which were served by Mesdames G. Murray, Bean and Steel.

MORE THAN 2,000 POLLS TO BE USED IN ALBERTA VOTING

Voters in the twelve federal ridings of Alberta will, on Dec. 6, exercise their franchise in more than 2,000 polling divisions throughout the province. The riding of West Edmonton, one of the largest in the province, contains 350 polls, some of which are well into the northern wilds. West Calgary, with 98 polls while it will probably record one of the largest votes, is closely settled, and has the lowest number. The following is a list of ridings with the number of polls in each:

Battle River	203
Bow River	181
Calgary East (37 city)	101
Calgary West (38 city)	98
Edmonton East	210
Edmonton West	350
Lethbridge	120
Medicine Hat	197
Red Deer	194
Strathcona	189
Victoria	160
Macleod	175

LENIENCY TO BE EXTENDED FROM SASK. CREDITORS

Regina—There will be no moratorium declared in Saskatchewan; instead the creditor class will be asked to extend leniency to the farmers. This is the outcome of a conference held in the parliament buildings between the members of the provincial government and representatives of various commercial and farming interests, concluded with a pledge for the observance of the highest spirit of co-operation and mutual agreements as far as humanly possible, in order that the farmer might be retained on the land for the preservation of the basic industry of the province.

The conference was called by Premier Martin for the purpose of discussing the present situation. All were agreed that the present conditions, while undoubtedly bad, could be worse and that there was no need for a feeling that blue ruin was staring the province in the face. In direct opposition to any such suggestion, even those who recited cases of distress, indicated their firm belief in the potentialities of the province and its ability to weather conditions which, after all, are only of a temporary nature.

Cattle Prices

Will Increase

Is Prediction

P. Burns is still sanguine that the price of beef cattle will by next June be double the present market price. Since he made this statement a few days ago others prominently engaged in the cattle industry have not expressed such optimism although they are agreed that it is certain there will be a considerable advance in prices.

When seen, Mr. Burns stated he had no reason for altering his views. "Of course, it must be understood that I am referring to beef, or fat cattle," he remarked in reiterating his views.

Mr. Burns stated that there was not such a large number of immature cattle now going to the stockyards. That, he thought, was a good sign.

He strongly advised every stockholder to hold on to his young cattle particularly if he has plenty of feed," he said.

LIBERALS OF THE BATTLE RIVER RIDING ENDORSE CANDIDATE

At a representative gathering of the Liberals of the Battle River riding held in Edmonton on Monday, it was decided to endorse a candidate in the Federal elections on December 6th, and after the usual preliminaries, an unanimous nomination was given to Mr. H. V. Fieldhouse, of Wainwright the mover and seconder respectively being Messrs J. W. Wyatt, of Irma, and L. E. Roy, of Chauvin.

The S. S. of Grace Methodist church have now set the date of their Xmas Carol Concert for December 23rd next. Don't forget the date!

ALBERTA TEACHERS & AUTHORS' WEEK

During the week November 19-26 throughout Canada, schools, literary societies, patriotic organizations and all good citizens are invited to consider the claims of Canadian Literature. A reprint of an article giving an outline of the development of Canadian literature by Miss Marion Lockhart is being sent through the mails to teachers and others interested. It is hoped that teachers will make use of the material contained in this article for a series of talks to their pupils during this week.

The associated publishers in Canada have decided to offer 500 Canadian book prizes for school essays on Canadian literature. The 500 best essays will be selected by a committee nominated by the Canadian Authors' Association.

Alberta has a large number of men and women who have attained fame in the field of literature. Doubtless this essay competition will show that amongst the boys and girls in the public and high schools the axe with which later will help us to hold our place as a literary people.

Cabinet Heads

Reducing Staffs

Provincial Govt.

Living up to pre-election promises to practise strict economy in the administration of the affairs of the province, members of the Greenfield cabinet have been over their departments with a fine toothed comb, and have already wielded the axe with telling effect. It is estimated that about sixty appointees of the previous government have already been discharged, and in several instances their positions have been abolished entirely or merged with other departments.

Taking an average of \$100 per month, this means that a saving of about \$60,000 per year has already been effected. And the end is not yet in sight, for Dame Rumor has it that another list of 135 names has already been submitted, and that as soon as the present federal elections and the cabinet bye-elections have been disposed of, those members of the civil service who are on the list will find that their services are also being disposed of.

EARLY MORN FIRE

DESTROYS GIRARD HOME

Owing possibly to an overheated stove, the home of Messrs Albert and Euclid Girard, situated on the N. E. 30-44-54, was the scene of a bad fire in the early hours of Tuesday morning. Luckily the occupants got out safely, but before any attempt could be made to salvage any of the contents the whole building was such a roaring furnace that the owners could only seek protection, and in a very short while the once comfortable home was nothing but a pile of ruins.

Don't miss the big dance to-night, which the boys of the town are giving in the theatre.

PRESENTATION TO REV. N. PRIESTLEY

It was a kindly thought that provided the U. F. A. members with such a nice cup of tea at the rest-room on Saturday last after their meeting. A presentation of a purse of gold was made to Rev. N. Priestley by the U. F. A. members at the same gathering in recognition of his work as president of that body for the past two years.

THE EXAMINER'S WEEKLY REVIEW OF PROVINCIAL MARKETS

(Friday November 18th, 1921)

CATTLE

Beef—Stronger—Edmonton yards had good buyers for many outlets, and prices are stronger, with top steers, \$46.50, the latter being exporters; good butchers, \$3.50; \$4; \$2.75; \$3.25; common, \$1.50; \$2.25; choice cows, \$3.35; \$2.50; good, \$2.50; \$3; medium, \$2.25; \$2.50; medium, \$2.25; common, \$1.50; \$2; canners down to four bits. Bulls slightly advanced to \$26.25 for tops and down to 50c on canners. Calves also higher, with top \$3.50; \$4; good \$2.50; \$3; Feeder and Stocker—Market active, but buyers insist on good breed; choice feeders, \$2.75; \$3.50; stocker steers, \$2.63; stocker heifers, \$2.62; \$2.50; stocker cows \$1.50; \$2.

HOGS

Calgary market receipts light, with a few sales early in the week at \$8.75; \$8.90, Thursday's arrivals at \$8.75, today's price \$8.75.

Edmonton prices have been working down, and week-end sales were at \$8.25.

GRAIN

Irregular—Prices during the week have been swinging fairly wide, but on the whole there is a firmness which is taken by a time to indicate that prices for a time are not going back to previous low levels. Crop news from Argentina and Australia will be governing factors in the market.

PRODUCE

Butterfat—Edmonton district creameries have advanced price, prices on direct shipments 3c, making creamery prices 37c, 34c and 31c on specials, first and second quality, with the station prices 33c, 32c and 27c; receipts light. Creamery Butter—Price advanced 3c on cartons; shipping is nil, as not enough fresh butter being made to meet local demand. Eggs—Receipts of fresh eggs very light, and prices advanced to \$22; eggs being imported from eastern provinces and States. Poultry—Butter conditions have improved trade, and springs are quoted 12c; hens, 10c turkeys, 18c ducks and geese, 13c; retail trade still slow.

HAY

Steady—Changed weather conditions may improve market, but no developments yet; upland at country points, \$12.25; timothy, \$17.63; as prices paid farmers at shipping points.

CROSSING THE BAR

DR. JAMES A. LITTLE

The funeral was held on Friday afternoon at 2 o'clock, at Edmonton cemetery, of Dr. James A. Little whose death took place at Onoway. Many friends gathered to pay their tribute and last respects to the deceased, who was well known in Edmonton and who, up to the time of his death was in charge of the Onoway hospital. The body was borne to the graveside by members of the floral tributes sent from out friends of the deceased. Dr. Allen D. Harrison, and Dr. Middlemass of Wainwright; Mr. Pointer, Mr. Lawrence, Mr. Hughes, of Onoway, acted as pallbearers. Rev. A. Lloyd, Rev. Bishop, Rev. Priestley, Rev. Doodstock assisted in the funeral service. Many floral tributes were sent from outside points, which included Wainwright and Onoway. As a tribute to Dr. Little, the flags on the city hospitals were flown at half-mast. Interment was made in Edmonton cemetery.

Dr. Little was for years a resident with his family here, and will be remembered as a partner of Dr. J. Middlemass.

THREE WILL CONTEST BATTLE RIVER RIDING FOR FEDERAL SEAT

At the Town Hall, Wainwright on Tuesday, Returning Officer W. E. Mills sat to receive nominations for the forthcoming election on Tuesday, December 6th, and at the close of the appointed period he declared the following to be the nominees and legally qualified to enter the race for the parliamentary seat at Ottawa:

Henry Vernon Fieldhouse, of the Town of Wainwright, barrister;

John W. G. Morrison, of the Town of Vermilion barrister;

Henry E. Spencer, of the Village of Edgerton, farmer.

One thing to be thankful for is that the Atlas Lumber Co., reduced the price of their cost just before this cold spell struck us.

FORD MOTOR TRUCKS

EFFECT BIG SAVING

As an illustration that the successful man does not waste his time telling of unfavorable conditions, or trying to place the blame for them on any class or Government, nor does he quit trying to do business because conditions are worse than in former years, is shown by the way that Wm. Featherington and Ed. Symes who farm from 20 to 22 miles north of town have solved the marketing of cheap grain. At present prices of grain they figured that making three trips a week they could not afford to haul in the old way by wagon so purchased Ford Motor trucks and are now hauling as much grain in two days as they could haul the other way in a week. They have reduced the price of marketing their grain by at least one-half.

Dr. Middlemass is having a garage built in the rear of his residence.

Messrs H. P. May and P. Dewar were away to the city at the week end.

Alberta Government
Advances \$5,000 To
Red Cross As Loan

Another proof that the Alberta government has taken into serious consideration the conditions existing in districts of Southern Alberta was provided when they recently advanced the provincial Red Cross organization \$5,000 to carry on relief work. The advance has been made to the Red Cross as a loan, which may be paid back when the society is able by its voluntary donations. The money was advanced after the government satisfied itself that the need existed and that proper facilities had been provided for its distribution and the thorough investigation of cases.

The best part of this money will be spent immediately on underclothing and shoes for children. There is a constantly increasing demand for this class of relief for the south, and Red Cross officials say that little of this description is received in the donations of second-hand clothing.

P. JENSEN LOSES
BARN BY FIRE

Mr. Peter Jensen, north of the river had the misfortune to lose his barn and part of his harness by fire. He left a lighted lantern hanging on a wire while he went out of the barn to drive in his horses. When he returned the lantern had fallen of the hook and the barn was a mass of flames. It was only partly covered by insurance.

We are glad to know that Mr. Geo. Hopper who has been on the sick list is recovering.

The A. P. P., journeyed to Edmonton on Tuesday in charge of a one-legged man who was a transient in town, and who unhappily has had the other foot frozen.

WAINWRIGHT DISTRICT AGAIN PROVES TRUE!

Proof that Wainwright is a true grain country is again to hand in the returns received by Mr. Peter Boros.

Mr. Boros farms about four miles from Fabyan, from which point he shipped a car of wheat through Grain-buyer Gotoeb of the Bawlf elevator. He has just received his returns for this lot finds that the grade "No. 1 hard" This returns are worth while; we'll say!

TO COMMEMORATE MULTITUDES WHO GAVE THEIR BEST

London—The permanent inscription on the new stone erected at the grave of Great Britain's unknown warrior in Westminster Abbey, has been revealed. It is as follows:

"Beneath this stone rests the body of a British warrior, unknown by name or rank, brought from France to be among the most illustrious of the land, and buried here on Armistice Day, November 11, 1920, in the presence of His Majesty King George V., his ministers of state, the chief of his forces, and a vast concourse of the nation. Thus are commemorated the many multitudes who, during the great war of 1914-18, gave the most that man can give, life itself for God, for king and country, for freedom, home and empire, for the sacred cause of justice and the freedom of the world. They buried him among the kings because he had done good toward God and toward his house."

25 PRESCRIPTIONS A MONTH SUGGESTED BY ALBERTA DOCTORS

Twenty-five prescriptions a month is the amount that has been suggested by physicians themselves as the necessary amount of liquor that is required by a doctor in the carrying out of his professional duties. The Alberta Medical Council waited on the Alberta government Wednesday morning and discussed with them a number of matters that are of common interest, including the matter of liquor prescriptions.

They went into the matter of supplying better medical assistance to the outlying districts of the province, suggesting that the government pay two-thirds of the mileage of a doctor in such a locality in order to ensure him a living. They claim that many doctors who had been willing to go into these outlying spots, and in fact had really gone in, had had to move out, not being able to collect enough money to give themselves a living wage.

Several ideas for co-operation between the government and College of Physicians and Surgeons were suggested whereby some system could be worked out for the better service in those districts. The council also, through the Medical association, promised co-operation in helping to furnish medical aid in such districts.

Alberta Police

Are On Lookout

For Wanted Men

The Saskatchewan and Alberta police are on the lookout for two men, M. G. Waston and G. W. Morris, for whom warrants have been issued on a charge of highway robbery whilst armed with dangerous weapons. Waston is a Canadian, and was for a time a member of the Royal Canadian Mounted Police.

The above named represented themselves to the police officers, and arrested one Konstanty Kordus in the hotel at Nokomis, in the presence of several people, and conveyed him to a rooming house in Saskatoon, Sask., where they held him a prisoner for some twenty-four hours on the pretext that he was wanted for a murder in Alberta. In the meantime, they relieved him of \$94, found in his possession.

POLITICAL ADVERTISING

THE ONLY HOPE FOR WESTERN CANADA IS LIBERAL POLICY

To The Electors

Ladies and Gentlemen,
Having been honored with the nomination for the forthcoming Federal elections to uphold the banner of Liberalism, I beg to solicit your vote and confidence on Tuesday, December 6th next.

The principles for which I stand are the well- tried and fully-proved ones of "Government of the People, By the People, For the People," principles under which our beloved country has in the past made the greatest advances, and our people have become most prosperous.

Canada, especially Western Canada, is suffering today from the aftermath of the Great World War and from overtaxation in the form of High Tariffs, High Freight Rates, and High Cost of Living. These, combined with the low prices of farm produce have made it difficult for the Western Canadian to make any progress.

Our hope lies in the opening up of new or wider markets, and the reduction of Tariffs, Freight Rates and Cost of Living, which will insure to the producer a proper profit for his work.

Never was Canada more prosperous than under the former Liberal regime, and the Liberal policy is the same today as then—a tariff for revenue only, freight rates at a fair minimum, free trade in farm products, and the opening up of all available markets for Canadian goods.

The issues of the day are, without doubt, being purposely fogged by classes and groups for ends which are hard to realize, but the principles of true Liberalism—the government of the whole for the good of the whole—are the only ones which will assist our country, populate our territories, advance our status before the nations of the world, and assist each and every Canadian to become individually prosperous, and for these and many other reasons I would ask you to VOTE FOR

Yours respectfully,
H. V. FIELDHOUSE

PROTECTION OF

TREES AND PLANTS

WINTER MONTHS

A little protection will often bring plants safely through the winter, when, if they are left exposed, they may either be killed outright or badly injured and, in the case of fruit, the crop may be much reduced. Plants are also protected from mice in winter. The plants usually protected from the weather are strawberries, raspberries, grapes and roses.

It has been found by experience that although strawberries will often be safely through the winter without being mulched, there are winters when it pays well to have the plants protected by a light mulch as in such winters if the mulch is not there the plants will be killed. In mulching strawberries the plan is to wait until hard frost or just before winter sets in, and then spread a light covering of loose straw over the plants. A thick mulch may do more harm than good. The cleaner the straw the less work there will be in eradicating weeds next summer. Marsh hay, where it can be obtained, is good as it is comparatively free of weed seeds, and it will not lie too compactly over the plants.

Where raspberries are injured beyond recovery in Canada by mice. This can be prevented by wrapping the trunks of the trees with building paper just before winter sets in, having the paper come close to the ground and putting a little earth about the lower end of the paper so they will not get at the tree from below. Mice will not usually eat through the paper, but in some cases they are close to the ground, the paper need not be more than eighteen inches to two feet high. The paper should be tied after wrapping so that it will not come off.

Farm Uses For Ford Trucks

Fence repairing and building.
Hauling implements to and from fields.
Piling hay loads.
Hauling seed grain and fertilizer to the seeder.
Hauling manure to the field.
Hauling bundle grain to the thrasher.
Hauling fuel, water and lubricating oil to the tractor.
Hauling baled hay to the barn.
Hauling corn bundles to the silage cutter.
Hauling products to the market.
Hauling supplies to the farm.
Hauling water to live stock.
Hauling stones from the field.
Hauling car corn from the corn picker to the crib.
Hauling corn to the corn-crib, or corn shocks to the husker-shredder.

ATHABASKA AND SLAVE

RIVER DISTRICT

The oil producing possibilities of the Mackenzie district have awakened interest in North-western Canada to such a degree that an active demand for information regarding the undeveloped resources of the various localities is reported by the Department of the Interior. In order to provide authentic information with respect to the Athabaska and Slave River districts the Departments, through its Natural Resources Intelligence Branch, has published an interesting report on the natural resources of this territory. A map of the district provides further particulars with respect to transportation facilities and general topography.

COMMERCIAL FEEDING STUFFS

(Experimental Farm Notes)

There has recently been issued from the Division of Chemistry of the Dominion Experimental Farms, Ottawa, a bulletin, No. 47, entitled "Commercial Feeding Stuffs".

This bulletin contains the chemical analyses and microscopic findings of over four hundred samples of feeding stuffs recently throughout the Dominion and includes a consideration of all the more important milling by-products and compounded feeds now found on the Canadian market.

The analytical data have furnished the basis for the valuation of these feeds from the nutritive standpoint and the microscopic findings—a new feature in work of this character—indicate the presence or absence of noxious weed seeds or other foreign matter, which might render the feed unpalatable or poisonous to stock.

The feeds considered include bran, shorts, middlings, feed flour, barley feeds, oat chop and oat feeds, corn products, oil cake meal, calf feeds, oat chop and meal calf feeds, hog feed, poultry feeds, and number of miscellaneous products sold under brand names, while it does not claim to be exhaustive, the bulletin furnishes information on all the more common feeding stuffs.

This bulletin should prove of very considerable value to the farming interest throughout the Dominion and serve as a useful source of reference for all concerned in the purchase and use of commercial feeding stuffs. Copies may be obtained on application to the Publications Branch, Department of Agriculture, Ottawa.

We are showing the first samples of Private Greeting Cards for Christmas and the New Year at the Star office, and the prices are reasonable. Let us have your order early.

POINTED PARAGRAPHS

The fellow who is pulling on the oars hasn't much time to rock the boat.

We measure our road to wisdom by the sorrows we have undergone.

Principle counts in business—especially the kind with a dollar mark in front.

We honestly believe that too much to eat has caused as much misery as too little.

A survivor of the San Francisco earthquake and a survivor of the Messina earthquake have married. They had taken a thorough course of preparation.

As soon as Eve ate of the apple she wanted some garments less diaphanous than the salubrious ozone of Eden. The women of today should eat more apples.

Some Mexican raiders attempted to cut out a woman's tongue but fortunately they made off after she had given them a sample of it.

Seventy-five per cent of the profits from the G. W. V. A. ball will be donated toward the expenses of the I. O. D. E. memorial.

The Lure of Fleet Street

Is not this an over-cooked phrase? Fleet Street may be glitteringly seductive in the shekel sense, and a certain hall-mark of status be acquired there, but beyond that there is not much to dazzle a provincial. "Better be first in a little Iberian village," said Caesar, "than second in Rome." A free modern rendering might be, "Better be a Sun of Journalism outside London than a tiny twinkler in the Metropolitan Press firmament."

I have never ached to walk the stairs of Fleet Street. I have my own Street of Adventure, which I traverse daily as Somebody. To be regarded as a real Somebody when jogging down Fleet Street is a joy reserved for a microscopic percentage of those who drift into London from the provinces. "Yes," thinks the reader, "We know all about the drowsy, depressing, dead-and-alive hole out of which The Sloperton-cum-Blank Herald, Muggleton and Tripewell Gazette, and Six Counties General Advertiser pokes its head on market day."

No, I am out of London, but I live amid buses and trams, shouting newsboys, and the throbbing life of a self-contained world. I have my own little world around me, almost hourly making changes, I feel its pulse with as much interest as the Fleet Street sub-editor daily gives head and hand to national news. To particularize, My House of Parliament are round the corner at the Town Hall. I sit over the Speaker's chair. Local Council life is a swift under current. I know much about them as "Toby, M.P." does of the shallows and deeps of political life at Westminster, and, in my small way, they are quite as interesting.

I know just where storms are likely to brew. Sometimes I am pulling the strings. Mr. Speaker may be attacked, and there are exciting divisions. Every meeting adds a chapter to local history which is far more to me and my fellow citizens than what an average day's Parliamentary sitting produces. The Mayor is my Prime Minister. We have pricy chats on affairs of State. These conversations may be fraught with as much consequence to our little world as Downing street conversations are to the country and Empire. Likewise I am free to drop in at any time on the Chancellor of the Exchequer (the chairman of the Finance Committee). We do not talk about remedies for the collapse of foreign exchanges, but the prospect of the next local Budget giving us lower rates. In short, I enter into the confidence of the whole of a miniature Cabinet.

In a fine old semi-cathedral church I see our Westminster Abbey or St. Paul's. Our services of thanksgiving or intercession on national occasions appeal to my better feelings more effectively, and give a certain satisfaction not to be found were I at the real St. Paul's or Abbey enduring the mental anguish of trying to go one better descriptively than, "Here a great multitude; there a great solitude." The Rural Dean, D.S.O., is my Archbishop of Canterbury, one who can be met on terms of equality. A cigarette and chat with him is one of the sweeteners of the daily round. Does the Fleet Streeter have a pipe with the Primate when calling at Lambeth Palace? Take club life, young man from

the big daily who tracks his game to the big West End club—the man out on an ordinary news "stunt"—seldom, I am sure, gets the one-of-us sort of hospitable greeting. At every club in my town I am certain always of a hearty welcome. The Chief Commissioner at the local Scotland Yard is invariably gettable. At my G.P.O. I have only to solicit audience of the Postmaster-General to be promptly and courteously met. At the Fire and Ambulance Brigade headquarters I have the freedom of the watch-room, which otherwise is strictly private. Through doors marked "Private" I pass unchallenged. Any information is to be had for the asking. Our Country Court is a pocket edition of the Law Courts. And so on, ad lib.

Not without feelings of some pride do I reflect that the newspaper which claims me as a reporter is the combined Times-Telegraph-Mail of the district. A any rate it goes weekly into at least three out of every five households in a population-nearing 200,000.

What is more, in its own local sphere its influence on public life is greater than that which any daily has over national life. In short, the life in my Iberian village is but a miniature replica of that of Rome. I taste it fully at all points, but my Roman colleague drinks it in sips under many limitations.

Weekly journalism, of course is the hardest school in the profession. Reports are still laid on like pre-war telephones—unlimited service for fixed payments. Why should a 5/4-day week for journalists be regarded as a millennial ideal, while in the industrial life of the country it has long passed into stale and settled facts—Newspaper World.

DISARM! DISARM! From the hearts of the plain people everywhere goes a message of mingled entreaty and warning to the delegates to the great international conference about to be held in Washington. It is a short and simple message summed up in the word: "Disarm."

The people do not want a conference that merely confers. They do not want political palaver.

They do not want diplomatic manoeuvring. Least of all do they want any overt or secret militaristic influence to be allowed to intrude into the conference, keeping alive the old delusion that the surest guarantee of peace is to expect war—and to spend millions and billions of dollars living up to that expectation.

However theorists may argue, the plain people of the world know very well that the great spendings, the colossal spendings of the past have not preserved peace.

And from the experiences of the world war just past, the plain people can see more clearly than ever before that such fighting means for victor, as well as vanquished, misery unspeakable. The slaughter of the rising generation, sorrow in myriads of homes, vast spreading of disease, incalculable waste of wealth, widespread unemployment, weakening of national morale, and crushing burdens in taxes—that is what flows from the wars which the making of mighty armaments was to prevent.

Yet there remain those who would preach the outworn doctrine, "Arm to the teeth!" There remain those who, obsessed by this doctrine, wilfully blind themselves to the truth that if accepted as in the past, it must ultimately mean the breakdown of civilization.

The plain people urge the conferees at Washington to be deaf to the specious pleas of these architects of woe.

They urge the conferees not for a moment to lose sight of the terrible debt account of past and present war-waging and equipping for year.

And their hopes and their prayers are that from the conference will result a real and early removal of the burden and the menace that great armaments involve.

From New World and Old World alike, from the greatest cities and the tiniest hamlets, in throbbing chorus of longing and command, the plain people cry to their representatives now assembling in Washington.

Abandon all racial jealousies, all racial ambitions and fears. Think first and last of human welfare.

WAINWRIGHT, ALBERTA, NOVEMBER 23rd, 1921.

CENSUS GIVES ALBERTA

FIFTY PER CENT GAIN

All things considered, citizens of Alberta have cause to be indeed proud of the gain made according to the report of the census takers. For the last seven years of the past decade conditions have been such as to practically paralyze immigration, and in the year preceding that conditions developed which seemed to show that the country could not go on absorbing new-comers in anything like the numbers which had been previously welcomed to our province. War or no war, the outlook in 1913 was for a slowing down in the inward movement and a corresponding slackening in the rate of growth of the population of the western provinces. When war came, the movement stopped and it has not yet got back to a normal flow.

But in spite of these forbidding circumstances it is now found that the population of the province of Alberta in the ten year period has risen from 374,663 to 581,995, an increase of 207,332, or in other words we have increased 55.44 per cent. That is to say, the population as shown in 1911 has been added to by substantially more than one-half. There are now three people in Alberta for each two who were here ten years ago, and it must be admitted that this would be a fair rate of growth for a ten-year period in anything but boom times, and for such a growth to be accomplished during war times—and after deducting the losses due to the war, and the "flu" epidemic which swept the land three years ago—it is most assuredly good.

One most favorable feature of the report is the showing that it is in the country districts rather than in the cities and towns that the growth has occurred. Of the cities, only two—Edmonton and Medicine Hat—show a greater percentage growth than the provincial average of 55.44 per cent. gain; while of the towns only six of these grew faster than the province as a whole. The great bulk of our new population is on the land. The six cities in the province record a total growth of 25,343, only one of them showing a loss, while the thirty towns having each a population of 800 or over show an aggregate gain of 15,346, four of them reporting a shrinkage. Taken together the cities and towns show a decrease of 66,889, and the balance of 140,443 represents the gain in our farming population.

The rural population is thus shown to be growing more than twice as fast as the population of the business centers, and that in itself is important as the fact that the whole population is increasing as it is. It proves that the development which is taking place is of the safest and surest type. It is not based on imaginary values of city real estate or speculative values of any kind, but upon the actual production of wealth; mainly upon the production of farm crops and fuel—both necessities, both produced in surplus quantities, both capable of indefinitely vaster production, and both dependable as permanent sources of income. Not only is our population growing, it is growing in the right place.

Among the cities Calgary still holds top place with regard to population, although Edmonton during the past ten years added some 88,73 per cent to her 1911 figures. With regard to increase of population in the towns of the province, Redcliff holds premier position with an increase of 398.63 per cent, while the figures given for our own town of Wainwright show but the steady enlargement of 23.73 is the percentage gain for the ten years.

FARM DEPRESSION—

IS IT AVOIDABLE?

Canadian farmers complain that they have to sell their wheat low at this time, but they overlook the fact that for weeks at a stretch he only foreign demand for wheat has been for Canadian wheat, and that during those periods the American farmer has had no export market of any description for the fruits of his labors.

The incontrovertible fact is that the world wheat crop is about 220 million bushels larger than last year, with the increase practically all in Europe, and this coupled with the lowered buying power of the nations across the Atlantic has produced a low world scale of wheat prices.

Farmers are decidedly mistaken in fancying that if they had access to the United States market all their troubles and ills would be over. Continued pressure to sell large supplies of grain at terminal markets is injuriously affecting the American farmer as well as his fellow agriculturist of Canada. Both domestic and export requirements are limited, thus forcing prices to low levels. The December price for wheat on the Chicago market was the lowest for the last six years when last week it fell below the dollar mark, and fundamental principles are alone responsible for these abnormal low records—excessive supplies in commercial channels and an inadequate export demand to relieve the surplus. Indeed all farming conditions in the States are so bad that an Associated Press dispatch says that thousands of American farmers are contemplating coming to Canada, as they now regard conditions here as being so much better their own.

LAND FOR SALE

THE SOLDIER SETTLEMENT BOARD OF CANADA

CLARK'S TOMATO KETCHUP

Just a dash adds zip to the stew or fish, etc. The well-spiced and seasoned fine ripe tomatoes are a wholesome and tasty relish. Made from Canadian Produce and sold everywhere in Canada.

World Happenings Briefly Told

The Young Men's Christian Association building at Somerville, Mass., has been destroyed by fire. The loss was estimated at \$100,000.

Two Halifax, N.S., men returning from a hunting trip near Hubley's Lake, brought with them a 750-lb. moose.

A Spanish oil tank ship has gone from Southampton to the Moroccan coast, with 6,000 tons of fresh water. The water is for the Spanish forces fighting in Morocco.

The sum of \$21,000 is to be spent by the B.C. Government in converting the Boys' Industrial School, Point Grey, into a home for blind, deaf and dumb children.

Distinguished architects, sculptors, painters and decorators are combining to create a model doll's house for Queen Mary. It will be 8 feet high and completely furnished.

Thirty-five lives were lost in the wreck of the Ryuka Maru, a Japanese coasting steamer, which was wrecked near Khabarovsk, off the coast of Hokkaido, Nov. 2. The captain and the crew of 34 were drowned.

The treaty of peace between Austria and the United States became effective with the exchange of ratifications by the two governments between American Chancellor Schooner and Arthur Hugh Frazier, United States commissioner in Vienna.

The League of German Industrialists has voted to come to the financial aid of the government by placing at its disposal the foreign credit of the league's members which is estimated to yield one billion marks.

China's wheat crop has been so poor that brick demand for flour is anticipated. J. W. Ross, Canadian trade commissioner to Shanghai, advises that 15 or more large flour mills throughout the country may also have to import wheat to keep them running.

Vilhelmar Stefansson, Arctic explorer, recently reported that a party he had sent from Nome, Alaska, to Wrangel Island, about 100 miles north of Siberia, to establish a base for what he said would be a huge British exploring party into the north, had arrived safely at their destination.

People are going to Vienna from all parts of the country to eat as much as possible while their crowns, which have reduced greatly in value, still buy good meals. One restaurant owner reported serving more than 3,000 lunches in a day, instead of the average of 600.

YOUNG WOMEN AVOID PAIN

This One Tells How She Was Benefited by Taking Lydia E. Pinkham's Vegetable Compound.

Regina, Sask.—"For two years I suffered from periodic pains and nausea so I was unable to get around. My mother had me take Lydia E. Pinkham's Vegetable Compound, and I am much better and able to go about all the time, which I could not do before. I recommend Vegetable Compound to my friends if I know they suffer the same way, and you may publish my letter if it will help any one, as I hope it will."—Miss Z. G. Blackwell, 2075 Oiler Place, Regina, Sask.

If every girl who suffers as Miss Blackwell did, from irregularities, painful periods, backache, headache, dragging down pains, inflammation or ulceration would only give this famous root and herb remedy a trial they would soon find relief from such suffering.

It hardly seems possible that there is a woman in this country who will continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial after all the evidence that is continually being published, proving beyond contradiction that this grand old medicine has relieved more suffering among women than any other medicine in the world.

For special advice women are asked to write the Lydia E. Pinkham Medicine Co., Lynd, Mass. The result of forty years experience is at your service.

W. N. U. 1294

Seal Herd Increasing

Valuable Fur-Bearing Animals More Plentiful on the Pacific Coast. After having been reduced in numbers from 2,500,000 to less than 125,000 through unrestricted slaughter in the past, the great seal herd of the Northern Pacific has under the adequate protection afforded them by the government, again increased, until today it is estimated that there are at least 600,000 of the valuable mammals between the coast of Washington and the icy shores of Alaska.

The Indians, who alone have been permitted to hunt the seals under restrictions which compelled them not to shoot them but only to spear them, expect to capture about 2,000 seals this year. The money value of the skins taken since the close season for sealing schooners was declared in 1917 is said to be about \$500,000.

Survey For Power

The city of Winnipeg has voted \$10,000 for a preliminary survey of a City Electric Power site at Stave Falls on the Winnipeg River, where it is believed 30,000 h.p. will be developed in the next few years.

Hard and soft corns both yield to Holloway's Corn Remover, entirely safe to use, and certain and satisfactory in its action.

Laziest People on Earth

Natives of Sandwich Islands Do Not Have to Work. A traveller who visited the Sandwich Islands claims to have discovered the laziest folk going. He wrote that during his visit to one of the islands none of the inhabitants did any work to speak of. They squatted, chatted, laughed, played and acted in other ways more like a lot of little folks on a summer evening than the responsible heads of households.

Nature gives them enough to eat without any considerable labor, and they seem contented with what they thus receive. At Honolulu and other points work is done, but altogether the people of the islands are as lazy as they are happy.

To Survey North

Dominion Government Engineers are now en route to the North West Territory to make a survey of the lands, with a view of lowering the levels of the Lesser Slave Lake.

When Overtaken by Nausea Try This Simple Remedy. When you don't know whether it's going to stay down or come up, when you look like death, when you feel even worse, what you need is twenty drops of Nausea Remedy. It is a simple remedy, it is safe, it is effective, it changes your experience. Those feelings of vomiting disappear. Thousands of homes have been saved in case of severe stomach, gas-bloating, nausea and upset stomach conditions. Get it today, large 35c bottles sold at all Dealers.

Big Exports of Wheat

Huge Quantities of Grain Handled at Port William. During October there was marketed at Port William a daily average of 1,720,488 bushels of wheat, loaded in an average of 1,192 cars daily. This shows a 25 per cent increase over the wheat loaded for the same month last year. Since the opening of navigation on the 15th April there has been shipped from Port William and Port Arthur 126,395,495 bushels of wheat.

A Household Medicine. They that are acquainted with the sterling properties of Dr. Thomas' Electric Oil in the home, know that it is a household necessity. It is not without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an indispensable remedy. So, keep it at hand, as the remedy for it may come most unexpectedly.

Needle Is Extracted From Child's Heart. Most Remarkable Operation Performed at Minneapolis Hospital.

A canonic needle was removed from the heart of Dawson Sandies, two years old, at the Elliott Memorial Hospital at the University of Minnesota, Minneapolis, in what surgeons term the most remarkable surgical operation ever performed in the north-west. The youngster is expected to recover.

Dawson, a son of Mr. and Mrs. John H. Sandies, St. Paul, stumbled and fell while playing at his home and a needle from his mother's sewing basket penetrated his left breast. He complained of a pain in his left side and an X-ray examination revealed the needle close to the heart.

Dr. A. C. Strachauer, chief of the surgical staff at the hospital, decided to operate. The surgeon first opened the boy's breast and then the pericardium, where he expected to find the needle, which, however, had entered the heart. At each contraction of that organ the head of the small steel needle came into view. With a tiny forceps, Dr. Strachauer extracted it, and within a short time the heart, which had been beating 120 times a minute, returned to close to normal.

Tender Solitude. Little Tommy Brown was much interested in his new baby sister. One day he went to the nursery, and while he stood peering down upon it, Nurse was singing it to sleep. "Nurse," he whispered at last "she's nervy unconscious, isn't she?" "Yes," whispered the nurse, and continued singing the lullaby. Tommy paused for a few moments; then he said, in alarm, "Don't sing any more or you'll kill her."

To Exhibit at Chicago. The Province of Saskatchewan Agriculture Department will have a large exhibit at the Chicago International Stock Show in December.

Minards' Liniment for Colds, etc.

Curious Chinese Cures

Superstition Plays Great Part in Art of Healing. The art of healing is still based on faith and superstition in China. To the Chinese man evil spirits play a great part in all illnesses. The earth is supposed to be full of evil spirits ready to pounce upon the unwary whenever they see an opportunity.

Should a child be ill, it is believed that the soul has left the body. It must be called back before the child can recover. Calling for the return of the soul is a custom prevalent in all parts of China.

It is also the custom to pray for holy medicine. A patient must pay a visit to the temple and take from the altar a tube containing numbered sticks. He passes the tube over the incense several times until one of the sticks falls out. This is picked up and the number on it is read. A corresponding slip containing a prescription is then handed to him.

Human flesh is supposed to be efficacious in the case of certain illnesses, and young people will have pieces of flesh removed to make medicine for a sick father!

Lively Legal Lights

Lawyers in England Live to Vigorous Old Age. The law seems to lead to vigorous old age in England. First, we have the marvellous Lord Halsbury, aged 88. Then Sir Harry Pollock, who at the age of 82, is as bright and alert as if he were 50. The Lord Chief Justice, a youth of 77, recently went to Edinburgh at the invitation of the Scottish Bench to attend an evening meeting and dinner. He travelled by night; during the day played two rounds of golf; went to the meeting and dinner, where he made several speeches; next day he played two rounds of golf, and returned to London by the night train, commencing his duties in Court the next morning at 10.30, as fresh as a bird.

One Interview in 110 Years. Telegraphic Engineer Received by Lama of Tibet. The Dalai Lama of Lhasa in Tibet has just given an interview to an electrical engineer. This is the first time that a Lama has talked with an European in 110 years. Lhasa is on a plateau, 11,000 feet high which is perhaps desirable as sanitation is nonexistent. The air seems to want telegraphic communication with the outside world and there are faint signs of an industrial awakening. Mr. Fairley, a telegraph engineer, had an audience with "His Holiness," which proved to be kindly and very agreeable. He also visited the Tibetan Council called the "Council of Shapen." A twenty-four course luncheon followed.

Important Discovery in Egypt

Valuable Papers Have Been Found in Underground Necropolis. Thousands of mummified bodies of the sacred fish have been found by the French savant, M. Lacaze, in the underground necropolis of the famous ruined temple at their Medinet, Egypt. Each bird was in an elaborately decorated vase of earthenware embedded in a sort of cardboard formed by a conglomeration of papyrus which totalled hundreds of thousands of written documents. M. Lacaze found the find is one of the most important of the late discoveries in Egyptology. The work of deciphering the documents will take years.

Explorer's Important Discovery

Continuous Mountain Chain 2,000 Miles Long in Tibet. Among the greatest results achieved by the Hedin explorations in Tibet was the discovery of a continuous mountain chain, 2,000 miles long stretching east and west, and which, taken as a whole, is the most massive range on the crust of the earth. Its average height above sea level is greater than that of the Himalayas, and although its peaks are from 4,000 to 5,000 feet higher than Mount Everest, its snow-covered summits are not so high. Samples of iron ore have been brought down to Edmonton and mineral experts have declared them to be of good quality.

Unemployment in Denmark

Unemployment has been steadily increasing in Denmark since July. The unemployed now number 55,411. There is not much hope among business men that the winter will alter for the better during the coming winter. The high cost of living and the tremendous German imports compel Danish industries to lie dormant and hope for better times.

Gentleman's Agreement

United States and Canadian prohibition officials have entered into a "gentleman's agreement" designed to reduce the smuggling of liquor across the border to a minimum. It was announced at U.S. prohibition headquarters.

How's This?

HALLE'S CATARRH MEDICINE will do what we claim for it—rid your system of Catarrh or Bores caused by catarrh. We do not recommend it for any other disease.

Queer City in Ireland. The most unique city in the three kingdoms is, together, situated in the south of Tyrone, Ireland, an outcropping, consisting of a single street with houses only on the one side. There is a saying in the north—"All on one side, like Clougher." The other side of the street is occupied by the wall and overhanging trees of the Marquis's demesne, which gives the place a very picturesque appearance. Further, this street has a cathedral, and episcopal palace without a resident bishop, and a deanery without a dean!

Decidedly Unlucky. Hewitt—"It is unlucky to 'pick up a horseshoe'?" Jewett—"Not if an automobile is right behind you."—New York Sun.

Matches and Fires. A tree will make a million matches—a match will destroy a million trees.—Canadian Forestry Magazine.

If a man is wise he never jabs a horse's nose to find out what's in it.

I am BUK WONDERFUL IN PILES

Mr. WILSON writes: "I contracted piles through sleeping on damp ground. Treatment by the M.O. brought no relief and various 'pile remedies' I tried proved equally hopeless. Shortly after my discharge from the service a friend strongly advised me to get ZAM-BUK. One box of the balm brought such benefit that I determined to continue the treatment. In a few weeks ZAM-BUK caused the piles to completely disappear. All other sufferers should know of this wonderful herbal healer." Use ZAM-BUK for all your Skin Troubles.

Dutch Honey Bees

A consignment of Dutch honey bees has arrived for the use of Kelowna apiarists. The Dutch bee is celebrated for its honey producing qualities. Apiculture is becoming an important branch of husbandry among the fruit farmers of the Okanagan Valley.

SAVED BABY'S LIFE

Mrs. Alfred Tranchemontagne, St. Michel des Saints, Que., writes:—"Baby's Own Tablets are an excellent medicine. They saved my baby's life and I can highly recommend them to all mothers." Mrs. Tranchemontagne's experience is that of thousands of other mothers who have tested Baby's Own Tablets. The Tablets are a sure and safe medicine for little ones and never fail to regulate the bowels and stomach thus relieving all the minor ills from which children suffer. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

How Swiss Treat Their Unemployed

Shirking Work Is Looked On As A Disease. In Switzerland they are learning to treat men out of work as if they were suffering from a disease. It is found that a man out of work is likely to get the habit. When a man begins to dodge and avoid employment or shirk his normal tasks he is infected with the germ of sloth. He has an excuse for his idleness, and threatens to become chronic. So the authorities step in, much as a doctor would. They diagnose the case, study the symptoms, and endeavor to place the man in some employment where his capacities can be of service to himself and his fellows. Why not vaccinate against idleness?

Mother! Open Child's Bowels With California Fig Syrup

Your little one will love the "fruitful" taste of California Fig Syrup, even if constipated, bilious, irritable, feverish, or full of cold. A teaspoonful never hurts a child's liver or bowels. In a few hours you can see for yourself how thoroughly it works all the bowels and you have a well, playful child again.

Right Will Be Right

It is officially announced that the rule of the road in Victoria and Vancouver, and the Vancouver mainland, is to be changed from the left to the right hand drive on January 1st next. Hereafter, the left hand drive has been made very bad the search had been made fully 20 times in order to make it as thorough as possible.

Brahmins Avoid Friday.

Amongst the Brahmins of India no business is ever begun on a Friday.

Persons with blue eyes are rarely affected with color blindness.

Working women are always trying to work somebody.

Rose-Colored Crepe

Brightens Navy Tricotine

By Marie Belmont

This attractive dress is an admirable one for the matron in need of a pretty model for afternoon wear. It is made of navy blue tricotine enlivened with trimmings of rose-colored crepe. The latter is used for the loose under-sleeves as well as the narrow panels that flank the front of the dress. Bands of the crepe also make effective trimming about the frock. Should the practical-minded woman consider that the rose crepe is too delicate, she might substitute a contrasting shade of blue or one of the reds that are so much to the fore this season.

Unfit to Live—Must Die

This verdict is rendered a thousand times every week—no corn can live, it must pass out, drop off. If Putnam's Extract is applied to corns and warts, use the old reliable "Putnam's," it never fails, 25c at all dealers.

Battlefields Have Been Thoroughly Searched

Every Effort Made to Find Bodies of Soldiers. In the House of Commons; Sir Worthington Evans, secretary of state for war, stated that all battlefields in France and Flanders had been systematically searched for bodies of soldiers who had given their lives in the war. The battlefields had all been searched at least six times, he said, and in the areas where the fighting had been very bad the search had been made fully 20 times in order to make it as thorough as possible.

Right Will Be Right

It is officially announced that the rule of the road in Victoria and Vancouver, and the Vancouver mainland, is to be changed from the left to the right hand drive on January 1st next. Hereafter, the left hand drive has been made very bad the search had been made fully 20 times in order to make it as thorough as possible.

Accept only an unbroken "Bayer" package which contains directions worked out by physicians during 21 years and proved safe by millions for Colds, Headache, Rheumatism, Neuralgia, Rheumatism, Neuritis, Lambo and Pain. Made in Canada.

France Plans For Big Flying Corps

If Budget Passes Republic Will Have 40,000 Planes of Many Types. If the army budget passes parliament, the French military air service next year will have more than 40,000 airplanes of different types. With this equipment the French flying corps would be composed of 256 regiments each of 12 squadrons.

French aircraft constructors, according to latest reports, are at present in a strong position, chiefly because the government permitted manufacturers to execute the greater number of their war contracts after the armistice as the best way to subsidize and encourage the aircraft industry.

French manufacturers had in hand substantial orders also from Japan and several Latin-American countries. France owes her present lead in the air to this policy, together with active co-operation of the military technical services with civilian aviation.

New Life Preserver Prevents Sinking

A new form of life preserver, soon to be placed on the market, consists of an inflated rubber sheathing covering two air-tight curved metal chambers and resembles a large balloon sausage hanging in the middle. It is worn around the neck and will support a weight of 500 pounds. No impediment is offered to swimming, but when effort causes the body assumes a perpendicular position, with the chin above water.—From the Popular Mechanics Magazine for November.

Some of the finest lace in the world is made by the women of the Philippine Islands from a strong, silky fibre obtained from pineapple leaves.

"La Marseillaise," the French national anthem, was composed at Strasbourg.
